**ROHRER AESTHETICS**

### **Long Pulsed YAG | Vascular Reduction**

The Long-Pulsed YAG laser reduces vascular lesions, commonly known as spider veins, by using energy to heat, damage, and collapse targeted blood vessels. Technicians can also utilize the Long-Pulsed YAG to remove different types of vascular lesions, including cherry angioma.

### **Q-Switched Yag/KTP | Tattoo Removal**

The spectrum includes a laser tattoo removal device known as the Q-Switched YAG/KTP laser. The Q-switched YAG laser uses dual wavelengths (1064nm/532nm) to remove a vast range of tattoo pigments

### **Simple imperfection \$100 (MM \$90)**

*single cherry angioma, single spider vein, treatment of scars*

### **Complex imperfection or tattoo removal (small area) \$300 (MM \$270)**

*spider veins, angioma cluster*

### **Erbium YAG | Skin Resurfacing**

Erbium is a skin resurfacing procedure for the face, neck, chest, and hands to eliminate surface pigmentation and minimize mild to moderate fine lines and wrinkles. The Erbium treatment requires minimal downtime but helps patients achieve dramatic results.

#### **Full ablative**

Large area (face and neck) \$2000 (MM \$1800)	Package of 3 \$5000 (MM \$4500)
Medium area (decollete) \$1500 (MM \$1350)	Package of 3 \$4000 (MM \$3600)
Small Area (hands) \$1000 (MM \$900)	Package of 3 \$2500 (MM \$2250)

#### **Fractional: Less downtime**

Large area (face and neck) \$800 (MM \$720)	Package of 3 \$2000 (MM \$1800)
Medium area (decollete) \$350 (MM \$315)	Package of 3 \$900 (MM \$810)
Small area (hands) \$250 (MM \$225)	Package of 3 \$600 (MM \$540)
